MASTER LOCK UNIVERSAL BIKE

Mounting Bracket

Straps to loop around bike frame.

Mounting Adapter to secure cable to mounting bracket.

Mounting Adapter removed from Mounting Bracket

Universal Bracket Mounting / User Instructions

Mounting Instructions

Step 1: Place the bracket base on the bicycle frame and loop the straps around the bike frame, inserting the end of the straps into the screw slots.

Step 2: Tighten with the provided screws. Cut off the excess straps once the base is secure.

Step 5: Unscrew the screws on the mounting adapter, and remove the top portion of the adapter. Place cable in the adapter.

Step 6: Place the top portion of the mounting adapter as close to the bottom portion. Next, while holding tight both portions together, tighten screws for a secure fit.
