**SENTRY®SAFE INTRODUCES EXPANDED-CAPACITY GUN SAFES
WITH WHISPER-QUIET TECHNOLOGY**

*SentrySafe XL Quick Access Pistol Safes offer gun owners a way
to properly secure and store their firearms*

Milwaukee (July 18, 2017) – SentrySafe, a trusted leader in safety and security for more than 80 years, launches two new expanded-capacity Quick Access Pistol Safes: the XL Quick Access Pistol Safe and the XL Quick Access Pistol Safe with LED Light. SentrySafe’s modern design of its new gun safes along with best-in-class technology, address the needs of pistol owners who want to ensure they are properly securing their pistols and, at the same time, have easy access in the event that they need to quickly and quietly open their gun safe.

“As the demand for firearms continues to climb, we developed the new expanded-capacity pistol safes, which empower users to keep their firearms and families safe and secure,” said J.P. Benjamin, senior product manager for SentrySafe. “In addition to the two-pistol capacity and whisper-quiet technology, the safes were designed with features such as a quick-entry electronic lock and pry-resistant steel construction to protect against unauthorized access.”

Made from high-quality materials, the XL Quick Access Pistol Safes are equipped with multiple innovative features including:

- **Whisper-quiet technology** – whisper-quiet electronic lock entry with compression gas strut opens the door silently with zero feedback so users can remain hidden to the potential threats of a home intruder.
- **Single-hand access** – compression gas strut holds the lid open for reliable, single-hand access, even in confined spaces.
- **Solid steel construction & padded interior protection** – twelve-gauge solid-steel pry-resistant construction helps protect against unauthorized access and the interior compression foam lining prevents scuffing of contents.
- **Reliable locking** – unlock the XL Quick Access Pistol Safes by simply pressing any button to ‘wake up’ the safe and enter the personal access code to open the device. If back-up access is needed, the safes are equipped with an override key to manually unlock the safe.
- **Visibility in low-light situations** – the XL Quick Access Pistol Safe with LED Light model provides users increased visibility in low-light situations to access the safe contents, programmable in 0-, 10- or 20-second intervals.

SentrySafe XL Quick Access Pistol Safes provide users with peace of mind knowing their firearms are safe and secure, while also instilling confidence with quick, reliable access at all times.

The SentrySafe XL Quick Access Pistol Safes are available on HomeDepot.com and at select retailers nationwide.
