## Frequently Asked Questions

### What items are being discontinued? What are their replacements or alternatives?

Refer to the Quick Reference Guide.

### Why is Master Lock Company discontinuing these items?

Certain items are being discontinued to make it easier to select the right product. The simplified product line will also allow Master Lock Company to streamline manufacturing operations and improve customer service levels without sacrificing user application coverage.

### For how long will orders of discontinuing items continue to be accepted?

Orders will be accepted until inventories are depleted. We estimate American Lock pucks to be available through February 2017 and Master Lock pucks to be available through June 2017. However, items may be depleted earlier than expected in which case customers will be notified by phone.

### Will the replacement puck models fit the footprint of the current models and hasps?

Yes. All our lockbodies have the standard 2-7/8in diameter footprint which is compatible with all our puck hasps.

### Will users of existing Master Lock and American Lock key systems still be able to purchase locks for their system?

Yes. Master Lock branded puck locks will continue to offer American Lock keyways. Conversely, American Lock pucks will offer Master Lock keyways. Refer to the Quick Reference Guide on “How To Match Existing Keyway Systems”. Both brands will continue to support Edge® patented key control systems.

### Will LHC (lock hasp combinations) items be discontinued?

LHC items will continue to be available, but the discontinued puck locks will be replaced. The exception is the A2500LHC1. Customers should now order A801LHC as an alternative which will include the A2010 solid steel puck lock. Pricing will be adjusted to reflect this change. 770LHC will be added as a lower cost alternative. See summary below.

LHC	Current Lock	Future Lock
A800LHC	A2000	A2010
A801LHC	A2001	A2010
A802LHC	A2001	A2010
770LHC (new)	N/A	6271

## **American Lock and Master Lock Hidden Shackle Product Line Update**

January 10, 2017

To our valued customers:

In an effort to improve service levels for our customers, we will be simplifying our hidden shackle (a.k.a. puck lock) product offering starting in the first quarter of 2017. The simplified product lines will make selection of the locks easier for our end-users and distribution partners alike. It also will allow us to improve the efficiency of our supply chain and our on-time shipping reliability.

Our revised offering will cover most application needs, including lock body materials and geometries, as well as American Lock and Master Lock keyways. In this effort, we have improved the fitment and ease-of-use of the Master Lock cylinder. All our hidden shackle locks conform to the standard 2-7/8in (72mm) diameter footprint, making them compatible with our full assortment of shrouded hasps.

Please review the attached Frequently Asked Questions and the Quick Reference Guide for more detailed information. Any additional questions can be addressed by your distributor or your Master Lock sales representative.

We sincerely thank you for your support and your business over the years and we look forward to serving your security needs in the years ahead.

Sincerely,

Kyle Raabe  
Vice President, Commercial Sales  
The Master Lock Company
