PADLOCK KEYING SECURITY

ESTABLISHING A SAFE, SECURE AND CONVENIENT LOCKING SYSTEM

Keying Security is Equally Important to Physical Security in Commercial Security Applications

Keying security includes the security designed into the padlock's cylinder and operating key, and the way in which the product is supplied to the marketplace. Master Lock stands alone among padlock suppliers in both categories of keying security:

- Master Lock provides the largest range of tight-tolerance cylinders and keys that vastly eliminate unwanted key interchange. This helps to ensure one employee's key will not be able to inadvertently open a second lock.
- Master Lock offers key control services, and charted and reserved systems, all of which assure that your company's padlocking system maintains the utmost in key integrity, even as you reorder padlocks. This means that additional padlocks ordered can all be specified to operate by distinct keys, if that is your requirement.

Establishing an Optimal Padlock Security System

Evaluate Your Present & Future Needs:

- Do you want each padlock to have a different operating key? Specify keyed different (KD) padlocks.
- Do you want groups of padlocks to be opened by a single key? If so, order keyed alike (KA) padlocks. For example, it is often desirable for each employee to have their own set of keyed-alike locks.
- Do you want a supervisor to be able to open a range of keyed-different padlocks? Order master keyed (MK) locks. See "Master Keying" section for more information.
- How many padlocks will you need? If you require thousands of distinct operating keys, with no repeats, you will want to specify a Master Lock commercial security padlock with a 5-pin or 6-pin cylinder. See "Key System Capacity" for more information.
- Do you want your padlock to be opened by the same key that opens your door lock? You can!

Master Keying

Master keyed (MK) locks have to be ordered as such initially. Locks are not automatically pre-set so that a master key can later operate them. When you initiate a master-keyed lock system, you should also identify how large and complex the system might eventually become.

This chart illustrates a simple MK system, wherein a single master key will open any of several keyed-different change keys (CK).

Many MK systems provide additional levels of control, as diagrammed here. The level 3 grand master key (GMK), held by the security director, would open all locks throughout the system.

Lock Bumping Solution

Lock bumping has become a recognized method of violating most in-line pin tumbler cylinders. In response, The Master Lock Company stepped forward to create a revolutionary new lock cylinder that provides excellent protection against lock bumping, as established in the ASTM Standard F883-09. Our BumpStop® solution employs an innovative, patent-pending design which utilizes a unique reverse-rake tapered driver pin, high-performance springs, and precision-tolerance chambers. During a bump attempt, this solution prevents the transfer of force from the bump key to the pins and blocks rotation of the cylinder – so the lock stays locked. This feature is available in a broad range of Master Lock padlocks and door hardware and can be ordered by adding an “N” to the product number. Example: 6121N (vs. 6121), 3N (vs. 3).

Key Control Options

The patented Edge® Key Control System provides absolute key control, eliminating the risk of unauthorized key duplication. The innovative and exclusive cylinder design has an additional locking feature to increase security. Edge® is available in the full range of Master Lock commercial laminated and Pro Series® padlocks.

Restricted Keyways Key blanks are not sold. Cut keys are only available from the factory for charted systems. Master Lock maintains restricted key systems specifically for safety lockout padlocks, where safeguarding employees is the absolute priority.

Reserved Keyways The factory limits key blank distribution to specific customers. Cut keys are not readily available. Master Lock offers reserved key systems (RSV) for its complete Pro Series® and laminated product lines for commercial applications.

Charting Services Master Lock will keep a complete record of the progressive key codes assigned and manufactured into a customer’s padlocks for each order. Request this special service to receive a Commercial User ID number to reference on all subsequent orders. Any order submitted with the Commercial User ID will be manufactured to comply with the facility’s key system requirements.

Matching Your Security Door Lock Keys

The versatile Pro Series® line can also be ordered to operate with the same keys used in your current door security system. This can greatly increase convenience (fewer keys to carry) and security (padlocks operate with the same high-security, controlled keys). Pro Series® can integrate with door security systems from Schlage®, Yale®, Kwikset®, Corbin®, Weiser®, Sargent®, Russwin® and Weslock®; even interchangeable core keyways by Best®, Arrow™ and Falcon®...many popular keyways available!

Key System Capacity

All cylinders have limits to the number of change keys that can be provided. Be aware that whenever KD padlocks are supplied from open stock, the possibility exists that two or more locks provided will have the same operating key. This possibility of overlap increases as additional non-charted (see Charting Service) stock orders are received. It is important to know the key change limits of the padlocks you are considering for your security system. If the supplier does not, or can not, provide this information, the integrity of your keying system may be suspect.

Consulting & Support

Master Lock’s customer service staff and field sales representatives are qualified and ready to help you establish a safe and convenient padlock security system for your company. Call or visit the Master Lock website to get started on the path to effective keying security.

This chart identifies the change key ranges of standard BumpStop® technology padlock cylinders.

PADLOCK SERIES	MODEL NUMBERS	# OF KEY CHANGES IN KD SYSTEM	# OF KEY CHANGES IN MK SYSTEM
Edge® 6 Pin	WP6 in Master Lock	90,000	6,000
Edge® 4 Pin	WP4 in Master Lock	1,200	140
Pro Series® 6 Pin	6100's, 6300's, 6800's, 7000's	90,000	10,100
Pro Series® 5 Pin	6100's, 6300's, 6800's, 7000's	14,200	1,300
Safety Lockout	410, 406, 411, S30, S6835	40,000	140
5 Pin Laminated Pin Tumbler	21, 31, 81 & others	14,200	1,300
4 Pin Laminated Pin Tumbler	1, 2, 3, 4, 5, 6 & others	1,200	248
Small 4 Pin Laminated Pin Tumbler	7, 8 & others	800	160

Quantities listed in the last two columns are actual quantities of keys available. Mathematically there are many more keys that can be calculated but may have been eliminated because they are undesirable or create a mechanical limitation. MASTER LOCK® VAULT ENTERPRISE

ADVANCED SECURITY AND ACCESS MANAGEMENT SYSTEM

The Master Lock Vault Enterprise software and suite of *Bluetooth*® enabled hardware provide business users who manage many locks and many users with a convenient way to control access, manage assets and improve accountability. This proven security innovation eliminates the cost, security risk and complexity of physical keys.

Innovative Features

- Efficiently manage access to ensure the right users have the right access
- Simplify security set-up with bulk user uploads and fast lock scanning for registration
- Automatically map lock and lock box locations via smartphone
- Easily monitor access with robust data and audit trails
- Assured back-up entry method using manual, directional or numeric code on hardware
- Leverage the security of 256-bit, military-grade encryption

FLEXIBLE ASSET MANAGEMENT

Whether it's one lock or thousands, Master Lock Vault Enterprise provides businesses with unmatched security, simplicity and accountability.

INDIVIDUAL

Share permanent or temporary access with our app that turns smartphones into smart keys.

GROUP

Easily assign users and devices to unique access groups, on demand.

CUSTOMIZED

Enjoy system-wide customization, including the ability to overlay groups for efficient access management.

COMMERCIAL MAGNUM® PADLOCKS

MAGNUM®

Commercial Magnum® offers a stainless-steel-encased, laminated steel body, which provides weatherability and security for applications in outdoor, corrosive and caustic environments. The dual-ball bearing locking mechanism has maximum resistance against prying and hammering. A chrome-plated, boron-carbide octagonal shackle impedes cutting and sawing.
