

The **Master Lock** Company

Key Charting Registration Form

Register your site with The Master Lock Company. Once registered, Master Lock will send you a User Identification Number. By using that I.D. number each time you order additional padlocks we will use a new key code for each padlock we manufacture for you.

Master Lock provides this service free of charge. We accept no responsibility for duplicates that may occur in your system. To ensure you do not introduce duplicates into your system be sure to provide your User ID number every time you order additional padlocks.

Over time, the precision keying parts will wear, potentially providing the possibility of one padlock key opening another padlock. Regularly replace padlocks that have worn components.

When used in a Safety Lockout situation, key charting is one aspect of a successful lockout program. For advice on other aspects of setting up a safety lockout program please visit www.osha.gov or your country's appropriate governing organization.

Name: _____
