Lock Bumping –

Lock Bumping has become a legitimate security threat as information on the topic has become widely exposed in the news media and on the internet.

In response to this threat, The Master Lock Company developed exclusive patent-pending BumpStop® Advanced Technology that prevents the transfer of force from the bump key to the pins and blocks rotation of the cylinder. With a reverse rake tapered driver pin, high performance spring and precision tolerance chamber, our 4, 5 and 6-pin BumpStop® products resist bump attacks.

BumpStop® is available in a full range of American Lock padlocks and security products today!

Solid Stainless Steel Padlocks – Highest Corrosion Resistance with Strong Security

Solid Stainless Steel Padlocks

- Offers strong security and the highest resistance to harsh weather and caustic or salty conditions
- Exceeds ASTM Grade 6 requirements for padlock corrosion resistance, with stainless steel body, shackle, ball bearings, springs and trap door, and brass cylinder and actuator
- Offering the custom make-to-order options you've come to expect from American Lock, stainless steel padlocks come in 1-3/4in and 2in widths, with a choice of 1-1/8in or 2in shackle heights
- Stainless steel shackles with dual ball locking offer strong resistance to cutting, sawing and prying; serrated cylinder pins resist picking
- Designed to secure equipment and buildings in outdoor or corrosive environments, such as heavy-duty industrial or marine equipment and factories, and outdoor structures such as sheds, gates or other buildings
- Rekeyable, making them easy to service, with replaceable 5- and 6-pin cylinders that provide tens of thousands of key changes
- Optional upgrades include BumpStop® Advanced Cylinder Technology and Edge® Key Control
- Laser engrave company logo, employee name or key number

Solid Brass Padlocks – Maximum Outdoor Security

Solid Brass Padlocks

- Solid brass bodies resist corrosion – ideal for harsh environments
- Hardened boron alloy shackles for superior cut resistance
- Dual ball bearing locking mechanism resists pulling and prying
- 5 & 6-pin cylinders are pick resistant with tens of thousands of key changes
  - Serrated pins are virtually impossible to pick
- Rekeyable – replaceable cylinder and shackle
- Debris resistant cylinder performs extremely well in external applications – AL50 Series
- Non-rekeyable solid brass padlocks where padlock service is not necessary – No. A20 & A40 Series

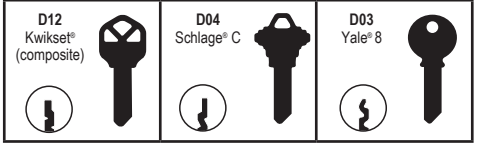
Door Key Compatible Cylinders and Padlocks

Same Key Can Open All Locks

- Use the same key that opens your security doors – Improve key control • Security • Convenience • Safety
- Cylinders may be ordered both as part of a complete American Lock® Door Key Compatible padlock assembly, or separately, keyed up and ready to plug into your system
- Padlock bodies will also accept the following OEM cylinders: Medeco® #20W20000 6-pin cylinder, Schlage® (6-pin Key-in-Knob), Assa® (65611), Schlage® Primus® & GMS® cylinders

Cylinder Options



Door Key Compatible Padlocks

- Hardened boron alloy shackles for superior cut resistance defy bolt cutters and prying
- Dual ball bearing locking mechanism resists pulling and prying
- Rekeyable – replaceable cylinder and shackle

Solid Steel Padlocks

- Case hardened, chrome plated, solid steel bodies resist cutting, sawing and corrosion

No. A3800

Solid Brass Padlocks

- Solid brass bodies resist corrosion – ideal for harsh environments

No. A3650

No. A3701

Government Locks

American Lock® has been known as The Locksmith's Lock with a padlock line offering unsurpassed quality and superior product performance. With over 90 years of precision machining and quality manufacturing, American Lock products exceed commercial industry standards in securing high-value property, withstanding extensive use and harsh environments, and defeating attempts to breach security at any level.

Protecting assets at facilities throughout the world, American Lock has delivered pride and workmanship through products such as our EDGE® key control product, and of course padlocks made to exact Government CIDs and PIDs. American Lock products are warrantied for life and continue to offer quality, value and technical innovation.

For over 60 years, American Lock has provided security solutions to every segment of the U.S Government and military defense agencies. With our unmatched line of security products, American Lock has over 60 NSNs assigned to our product line to meet the most urgent of applications.

- Where required, American Lock products are designed to stringent government standards, CID-A-A-59486, CID-A-A-56487 and ASTM F883
- BumpStop® Advanced Cylinder Technology option provides excellent protection against bump attacks
- Make-to-order capability – security products built and keyed to your requirements: shackle options, keying flexibility, laser engraving, key control and custom sets available
- 5-pin tumbler cylinder for added security
- More than 10,000 key changes available for maximum pick resistance
- Dual locking for superior pry resistance
- Most models are stamped "US"; sets are stamped "US SET"
- Non-removable keys available for added security

PADLOCK KEYING OPTIONS

- **Keyed Different (KD)** - Each padlock has its own unique key. All products are made keyed different unless requested otherwise.
- **Keyed Alike (KA)** - Keyed alike is a term used to describe a set of padlocks which can be opened with the same key. Keyed alike offers convenience to customers who use numerous padlocks by eliminating multiple keys. Many domestically produced products are available keyed alike. (Padlocks and cylinders can also be keyed-alike in sets or groups.)
- **Master Key (MK)** - In a master key system, one key operates all the master keyed padlocks or cylinders in one or more groups.
- **Rekeyable** - Rekeying is the process of removing a padlock's cylinder and either rearranging the cylinder pins to different locations in the cylinder chamber or completely replacing the pins. Finished replacement cylinders are available from American Lock for a quick and easy rekeying process. The advantage of a padlock with a rekeyable cylinder is that when there is employee turnover or when a key is lost or stolen, the padlocks can be easily serviced rather than replaced. Many American Lock padlocks are available with this feature.
- **Restricted (R)** - American Lock offers restricted key systems with factory controlled keyways. This feature offers added security by restricting unauthorized key duplication.
- **Edge® Key Control (WP)** - American Lock offers patent-pending Edge® Key Control. The manufacturer is the only producer of key blanks. Key blanks and cut keys are strictly controlled by the manufacturer. (Patented cylinder and keys are protected by law from unauthorized duplication.)
- **Master W1, W15, W17, W27, W81** - Cylinders which are keyable to Master Lock® padlocks.
- **Non-Removable Key (NR)** - The key cannot be removed from the padlock when the padlock is open. This helps prevent users from accidentally leaving the padlock in the open position. Only selected padlocks offer this option.

KEY CHARTING

- Customers can benefit fully from the large American Lock change key ranges by having us chart your keying system for you. We will keep a complete record of the progressive key codes assigned and manufactured into your padlocks for each order. You will be assured that there is no unwanted key duplication with the padlocks you purchase over time. Be sure to request this special service with your next order so that all locks purchased from that point forward will be manufactured to comply with your key system requirements. Any orders placed by an end user or distributor should note that they are on a key charting system, or reference their End User I.D. Number.

STAINLESS STEEL PINS (SP)

- Stainless Steel pins can be recommended if a customer has an application that requires more drill resistant security such as a remote job site or high theft areas.
- Minimum order requirements: 500 pieces
- Lead time: 4-6 weeks

CHAIN AND TAG ATTACHMENTS

- Small chains may be attached to padlock shackles in order to affix padlocks to truck doors, gates, equipment, or other applications.
- Brass tags may be affixed to padlocks for identification purposes. These items are available separately. or can be attached at the factory.
- See page 55

SPECIAL POWDER COAT FINISHES

- American Lock Company can provide custom powder coated finishes in a variety of colors. The powder coat is a tough e-coat finish that is chip resistant.
- Minimum order requirements are 2500 pieces.
- Lead time ranges and costs will vary with the type of finish required, approximately 12-16 weeks for the first order.

KEY BLANKS: See pages 43-44 for respective key blanks or cut key information.

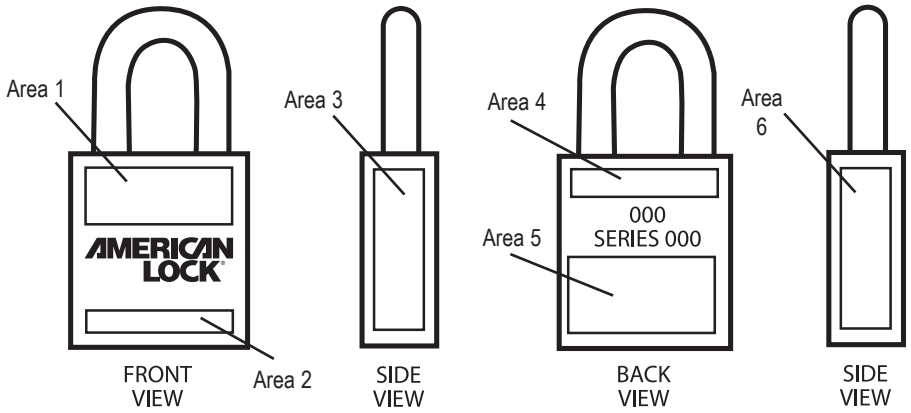
Custom Marking



LASER ENGRAVING

- Laser Engraving (LZ*N*, N=1-6) allows for easy identification of padlocks that is a permanent mark on the padlock that cannot be removed. Some applications are:
  - Safety Lock-out
  - Employee locker identification
  - Company logos for brand identification
- Six areas on an American Lock solid body aluminum and brass can be engraved for easy padlock identification.
- Numbers, letters, company logos, or alphanumeric characters can be added to a padlock.
- Logo engraving available in Area 1 & 5 only.
- There are a variety of type styles and sizes for text to choose from, or a customer can send a copy of their company logo and American Lock can permanently engrave it on a padlock.
- Not recommended for clear locks.
- Contact American Lock for order forms.

PAD PRINTING

- Custom pad printing is a great way for customers to personalize padlocks with an inexpensive, four color process. Candidates for this service are
  - Schools
  - Large institutions and manufacturing plants
  - Companies that want to increase brand awareness
- Companies can print logos, numbers, letters, or alphanumeric characters using a plastic resin paint that is fade and scratch resistant for five years.
- A logo can be made in up to four colors for easy identification with detail that can create magazine quality images.
- This process can be applied to any solid body padlock. Minimum order quantities are 1,000 pieces.
- Delivery of first order can take up to eight weeks.
- Contact American Lock for order forms and pricing.

OTHER

- **Custom Logo Stamping**
  - Companies can request custom logo stamping from American Lock.
  - For orders over 500 pieces, American Lock offers customer logo stamping on the padlock.
  - Costs vary for this type of service depending on the detail of the logo and padlock body.
  - Lead time: 10 - 12 weeks.
- **Other Stamping Options**

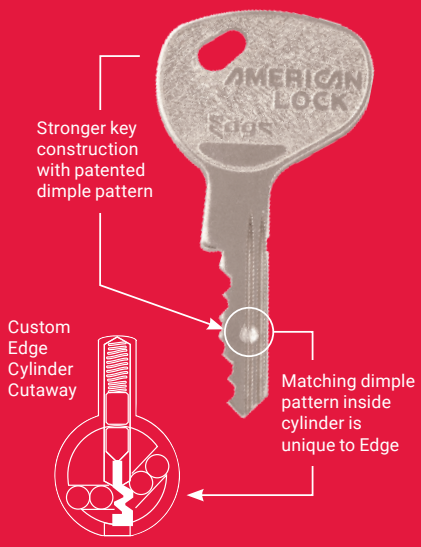
How Edge Works



Control and Eliminate Unauthorized Key Duplication

Padlocks are an important, effective and often overlooked cornerstone of security. Edge® Key Control gives you confidence and control over the integrity of your security network.

- Control and eliminate unauthorized key duplication
- Keys available only from Master Lock Company and authorized Edge® partners – copies cannot be made at stores
- Implement a single keying system across all padlock security applications
