

Edge® Key Control is an exclusive and patented system from the Master Lock Company

Total Control and Protection

With Edge® Key Control, the key blanks to your system are available **only** from Master Lock authorized location and these locations will only duplicate keys with your authorization.

Cost Effective

This **affordable** key control system is available across our broad line of American Lock® and Master Lock® padlocks. Add Edge® Key Control to American Lock solid body padlocks, Master Lock ProSeries® and Commercial Grade Padlocks for about \$10 per lock.

Single Key System Convenience

Implement a single key control system across the padlocks throughout your facility gates, fleet vehicles, portable equipment and more to control who has access to the various locations in your business.

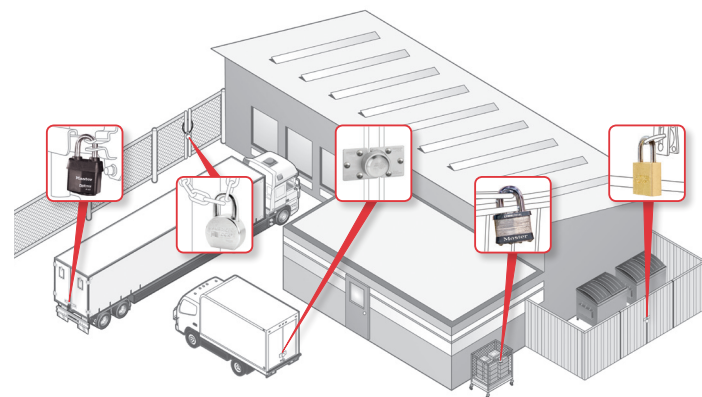

Total Control & Protection Cost Effective Single Key System Facility-Wide

Who Has Keys to Your Business?

Affordable Control & Protection with

What is Key Control?

Key Control is a way to increase security that is distinct from and in addition to the physical protection of padlocks.

With a Key Control system, you establish and control who is authorized to purchase copies of your facility's keys and what security dealer is authorized to make the duplicates.

While a simple idea, the program must be backed by knowledgeable and reliable security providers – your locksmith, security distributor and Master Lock. Working together, we assure that only authorized individuals obtain duplicate keys for your facility.

Key Control

Why choose Edge[®] Key Control to protect your business?

Affordable Key Control

Cost-Effective control of the physical security of your transportation fleet, storage, facility padlocks and more for only about \$10 extra per lock!

Single-Key System

Available across the broad line of American Lock[®] and Master Lock[®] padlocks, you can implement a single-key system across your facility padlocks.

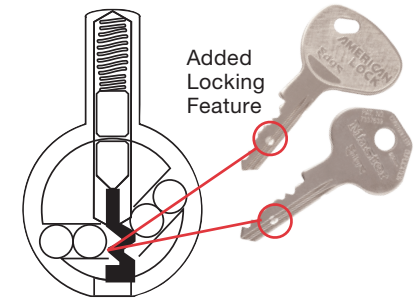

Complete Control

Control who can gain access to your business by selecting who is authorized to purchase duplicates and who is authorized to make them.

Reliability

With Edge[®] Key Control you have durable and reliable security products along with an extra strong key that withstands strenuous use.
