

SECTION 10 51 00

LOCKERS

*******The following articles are intended to be added to an Architects specification in an effort to assure coordination between locker manufactures and the manufacture’s that provide built-in combination or keyed locks for the lockers. Master Lock has developed such a program called the “Lock-Locker Compatibility Program”.**

Insert the following language into the “Submittal” and “Quality Assurance” Articles in Part 1 – General of any specification formatted to conform with the Construction Specifications Institute’s formats.

When the “Quality Assurance” or “Submittal” articles already exist within Part 1 of the specification section insert the paragraph and sub-paragraphs at the end of the appropriate article.

PART 1 - GENERAL

1.X SUBMITTALS

- A. Submit manufacturer’s published lock-locker compatibility matrix showing that lock is compatible with locker model specified.

1.X QUALITY ASSURANCE

- A. Locker manufacturer shall be a participant in the **compatibility** program offered by the Master Lock Company – “Lock-Locker **Compatibility Program**” .
Locker manufacturer shall perform the following reviews per the requirements of the Master Lock Lock-Locker **Compatibility Program**:
 1. Annual Compatibility Review: Manufacturer shall publish a matrix which indicates each locker model and which Master Lock products are compatible with each locker.
 2. Manufacturer shall administer a program which randomly checks lock-locker compatibility during locker production to assure that the locker doors are properly prepped for the lock in accordance with the lock manufacturer standards, that the locks fit, and the lock-locker assembly operates.
