

# Lock-Locker Compatibility Program™

**Have Confidence in Your Lock and Locker Selections!**

This Seal Signifies Lyon Workspace Products Participation in the Lock-Locker Compatibility Program.™

**We are dedicated to providing you with a problem free solution.**

## Compatibility and Quality Program

### Master Lock Company and Lyon Workspace Products

**Committing to lock and locker compatibility and quality**

We understand that the compatibility between lock and locker must be seamless. We have your solution – the Lock-Locker Compatibility Program.™

Master Lock, in partnership with Lyon Workspace Products, has developed an ongoing engineering collaborative and testing program. The program is designed to help ensure the locker purchaser receives a high quality, seamless, locker locking solution.

## Program Elements

- ✓ **Annual Compatibility Review**  
Verification testing and design review by engineers ensuring compatibility between locks and lockers.
- ✓ **Periodic Production Spot Checks**  
Lyon Workspace Products performs periodic operation compatibility testing of locks on actual locker orders.
- ✓ **New Product Validation**  
Ensures that new lock and locker products work as intended before introduction, providing seamless locker locking.
- ✓ **Annual Design Conference**  
Master Lock and Lyon Workspace Products engineers meet to support, collaborate, and assist in continuous improvements.

Locker manufacturers participating in this program have agreed to conduct lock-locker testing and work in collaboration with Master Lock. This does not guarantee specific security or durability standards. Locker purchasers should conduct their own evaluation of lock-locker solutions prior to purchase to ensure the selected lock-locker solution meets their needs.

Please use this table as a guide only. Master Lock recommends trying your selected lock on your specific application prior to any purchase. Contact your lock distributor or Master Lock for assistance.

1690/1790 locks are recommended for single point latch lockers.

\*Note: Single point latch lockers transitioned from horizontal latching (1652 or 1670) to rotating latching (Wrap Around Latch™) in 2008. Lockers built before 2008 will use horizontal latch locks. Please check with the locker manufacturer to confirm latch type used for lock built in 2008 or after.

1 Locker Selection	2 Handle/ Latch Type	3 Lock Selection		4 Highest Security		Built-In Combination Locks		Built-In Keyed Locks		Combination Portable Padlocks				Keyed Portable Padlocks
		Electronic Built-In Locks	Multi-User Locks	BUILT-IN WRAP AROUND LATCH LOCKS	BUILT-IN COMBINATION LOCKS	BUILT-IN KEYED LOCKS	Key Controlled		Not Key Controlled					
							General Security	Higher Security	General Security	Higher Security
