PROSERIES
Keyed padlocks

Ideal for harsh environments and withstand extreme abuse

Weather Tough®

- Laminated steel body with thermoplastic cover protects lock body and cylinder from sand, dirt and other contaminants
- Hardened boron alloy shackle for superior protection against cutting and sawing
- Stainless steel dual ball bearing locking protects against prying and hammering

6230

Solid Steel

- Chrome-plated solid steel lock body for rust resistance
- Hardened boron alloy shackle for superior cut resistance
- Dual ball bearing locking mechanism resists pulling and prying

6321

Iron Shrouded

- Laminated steel body with solid metal shroud to prevent cutting
- Hardened boron alloy shackle for superior protection against cutting and sawing
- Stainless steel dual ball bearing locking protects against prying and hammering

6830

Solid Brass

- Solid brass body for superior corrosion resistance
- Hardened boron alloy shackle for superior protection against cutting and sawing
- Stainless steel dual ball bearing locking protects against prying and hammering

PROSERIES

Superior strength and weatherability!

Combination padlocks
Improved weatherability

- The dial dust cover and the shackle seals keep dust and grit out of the internal mechanisms for trouble-free operation

Stand up to physical attacks

- 56mm wide body with 9mm boron-carbide shackle
- Deadlocking mechanism provides extra pry resistance

Added user convenience

- 10,000 combinations possible
- Large ergonomic dials permit operation with gloves
- Easy to set with no special reset tool required

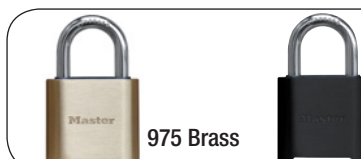

1177 Brass

1175 Brass

1178 Die Cast

1174 Stainless Steel

975 Brass

878 Die cast

Smaller resettable combination padlocks also available

- 51mm wide body
- 8mm hardened steel shackle

**Cost effective and flexible
customised padlock solutions**

Master Lock ProSeries padlocks can be customised to meet your specific needs. Our make-to-order capabilities allow us to create tailored security solutions for your applications

Laser engraving

Permanent and durable method to customise padlocks with name, logo or key number

Rekeyable padlocks

Allows to remove the cylinder to easily upgrade or match existing keying system providing locksmiths with greater ease and flexibility. Use a "Key in Knob" or "KIK" cylinder compatible with Euro Profile

Edge® Key Control System

Prevents unauthorised duplication of keys

BumpStop® Advanced Cylinder Technology

Padlock cylinder highly resistant to bumping and capable of detecting bump attacks

Key traceability

Free key charting service records the key numbers used by customers

Key System

Establish a key system to meet your unique requirements

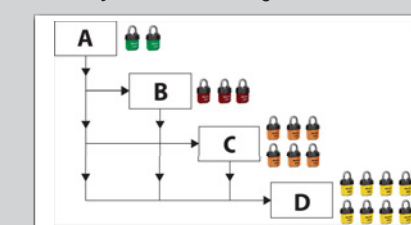

KD - Keyed Different
 The key opens only one padlock

KA - Keyed Alike
 Each padlock has its own key - All keys are the same and open all padlocks within the same group

MK - Master Keyed
 A Master key can open all padlocks across several groups (KD or KA)

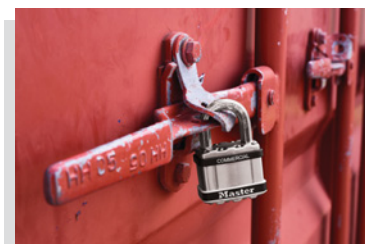

Cascading system:

Protect your entire building with the convenience of cascading access

A: The key opens locks in groups A, B, C, D
B: The key opens locks in groups B, C, D
C: The key opens locks in groups C, D
D: The key opens locks in group D only

HIGH SECURITY STANDARD PADLOCKS

EXCELL

Enhanced Security and Weatherability for Commercial Applications

- Octagonal boron-carbide shackle is 50% harder than hardened steel
- Laminated steel body with stainless steel sleeve, zinc outer sleeve or vinyl cover for better resistance
- Superior pry resistance with dual ball bearing locking

STANDARD SECURITY PADLOCKS AND HASPS

A full range of standard security solutions: Laminated padlocks, Marine application solutions, Brass padlocks and rectangular body padlocks ideal for securing basement storage units, factory fences or store front gates. We offer also a full range of hasps.

LOCKER LOCKS

NEW

Master Lock offers a full line of locks including **portable**, **built-in electronic combination** and **built-in keyed locks**.

ELECTRONIC BUILT IN LOCK

The multi-user built-in combination lock adds convenience to your facility by giving visitors the ability to choose their own locker and set their own 3-digit combination. Eliminates distribution, tracking / management of keys, combinations or locks.

- Brushed nickel plated zinc body & high gloss keypad
- Crisp display provides end user with clear lock/vacancy status
- Audio feedback & battery level indicator
- 12 button keypad supports 4, 5, or 6-digit codes
- Long battery life to minimize maintenance
- Enhanced design to withstand humid environments
- Single-user and multi-user lock modes

How does it work?

- 1 - Close locker door
- 2 - Enter any desired personal code (the dashes on the display screen will turn to dots with each button press)
- 3 - Press the button ✓ on keypad (the bolt will extend)

MECHANICAL BUILT-IN LOCKS

- Secure, easy to dial 3-digit combination
- NEW octagonal, stylish dial with larger dial numbers and easy grip
- Standard key control used for combination changes and allows quick supervisory access

3630

Multi-user lock ideal for a high visitor turnover locker rooms!

- Set-your-own 3-digit combination
- Solid zinc housing to provide durability for multiple uses on a daily basis
- Control key available for supervisory access

PORTABLE LOCKS

- Double-reinforced stainless steel body withstands abuse
- Hardened steel shackle for extra cut resistance
- Easy 3-number dialing with automatic scrambling feature to prevent reopening of lock
- Patented BlockGuard® Anti-Shim Technology withstands attempts to violate the latch mechanism
- Control key for supervisory access
- Color dials available

1525

CABLE AND CHAINS

Adjustable locking Python cable

- Patented locking mechanism holds the cable tight at any position from 30cm to 1.8m for infinite locking positions
- Steel braided interchangeable cable for application flexibility
- Reliable in harsh environments
- Rekeyable wafer cylinder for maximum pick resistance
- Available as KA (choose 8413KA) to open with the same key or order to match keys for padlocks with W1 cylinder

8433

Cylinder compatible with Master Lock padlocks!

One key opens Python cable and Master Lock padlocks (use W1 cylinder)

Hardened steel chains

- Square link for better cut resistance
- Vinyl cover to prevent from scratching
- Available in different lengths and diameters
- Can be used with rectangular or Pro Series Iron Shrouded padlocks

8010

8028

- 1500mm chain
- 8mm diameter
- Nylon protective sleeve to prevent from scratching

MASTER LOCK SECURITY SOLUTIONS

Perimeter gates, machines & equipment, remote shelters and vehicles are many of the assets that must be secured against theft, vandalism and greater security threats.

Only Master Lock has the ability to custom build commercial grade security products for any application and provide the special keying and identification services to satisfy your heightened security requirements.

Master Lock provide higher levels of both physical and keying security
Discover our security enhancements:

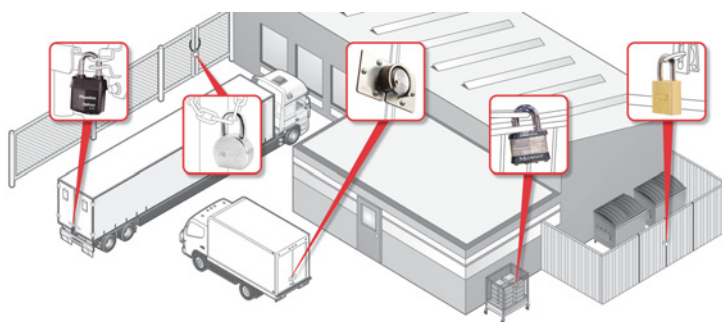

Edge® Key Control System

Simple and affordable key control security solution that strictly limits access to authorised personnel.

You can own a unique keying system that is exclusive to your facility.

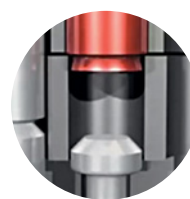

A key system that reserves key numbers just for you and restricts access to the key blanks making your specific authorisation necessary for anyone to make duplicate keys. Unlike commonly used keys, including some reserved keys, that can be copied easily at hardware stores or even locksmiths, the Edge Key Control System provides this exclusive level of keying security across a wide range of Master Lock padlocks.

BumpStop® Advanced Cylinder Technology

Lock bumping is a lock picking technique for opening a pin tumbler using a specially-crafted bump key. As a world leader in security hardware, Master Lock has stepped forward to create a revolutionary new lock cylinder that prevents this attack.

BumpStop® Advanced Cylinder Technology offers the highest lock bumping resistance by preventing the transfer of force from the bump key to the pins so the lock stays locked and personal possessions and property remain secure.

Reverse rake tapered driver pin
