Advanced Security and Access-Management System

Master Lock, the industry's security leader for more than 95 years, is changing the way companies securely manage access. Our new Master Lock Vault Enterprise software, designed for commercial users, and suite of *Bluetooth*® enabled hardware provide the convenient way to control access, manage assets and improve accountability. This proven security innovation eliminates the cost, security risk and complexity of physical key management.

Smart. Simple. Secure.

Our integrated software platform enables you to grant access to individuals, multiple users and user groups—temporarily or on an ongoing basis—through our user-friendly interface and Bluetooth technology. Issue and revoke access in real time, optimizing scheduling and enhancing security.

INNOVATIVE FEATURES:

- Efficiently manage access to ensure the right users have the right access
- Simplify security set-up with bulk user and lock uploads
- Automatically map lock and lock box locations via smartphone
- Easily monitor access with robust data and audit trails
- Assured back-up entry method using manual, directional or numeric code
- Leverage the security of 256-bit, military-grade encryption

The Simplicity and Savings of Keyless Security

Combine the cost benefits and convenience of keyless security with the control, flexibility and accountability of Bluetooth enabled hardware and integrated Master Lock Vault Enterprise software. This integrated solution provides efficient and effective administration of security management and user access.

NO KEYS TO LOSE

NO COMBINATIONS TO FORGET

NO UNAUTHORIZED KEY DUPLICATION

- Secure areas, materials, equipment, keys or keycards
- Easily assign access to groups or individuals by time and date
- Efficiently manage many locks and many users
- Increase accountability with audit trail of who accessed devices and when
