

Master Lock®

Multi-User Mechanical Lock

Ultimate Convenience for You and Your Customer

The Multi-User lock brings security and convenience to clients and staff at any health club, country club, university, spa or gym.

A built-in, set-your-own combination lock, the Multi-User solution allows clients to secure their belongings with their personal combination. Using three simple steps, clients can lock and unlock their locker at any time, any number of times, during their visit. Once finished with the locker, clients simply unlock and leave it ready for the next user.

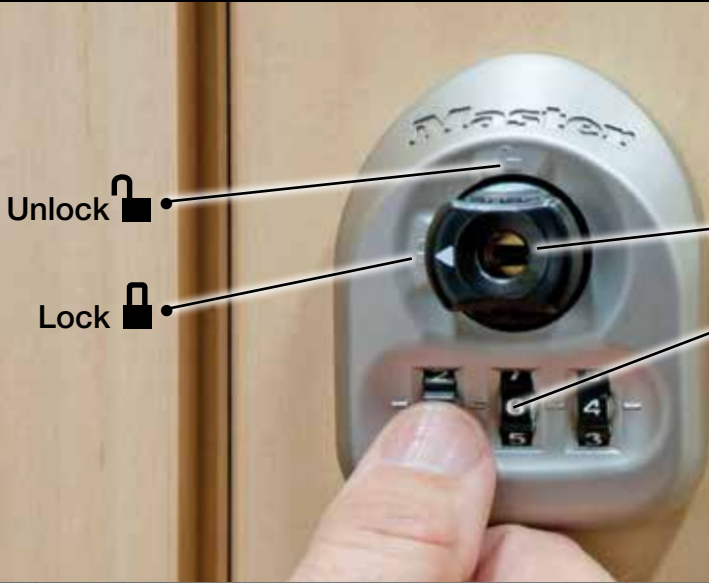

Facility staff also benefits with simplified administration and access. The Multi-User lock eliminates the distribution, tracking and management of keys, combinations or locks. Should a client forget a combination, instead of using heavy bolt cutters, staff has efficient access to lockers using the supervisory key. When needed, staff can relock the Multi-User lock and maintain the current combination. Or, staff can reset the lock, easily opening the locker for another client.

Designed and built to Master Lock specifications, the Multi-User lock is ideal for use at health clubs, country clubs, universities and similar facilities.

Ideal for use at universities, health clubs, country clubs and similar facilities.
