

### S856 & S866 Cable Lockouts

**S866 - Nylon core cable lockout device** Ideal for electrical applications

# Retractable Cable Lockout Devices for a Variety of Applications

#### **Rugged Zenex**<sup>™</sup>

Thermoplastic Housing Stores unused cable, making the device more manageable – whether in use or in storage

#### **Ergonomic**

Take-Up Wheel ~ Retracts the cable. Deep pockets allow for easy operation, even with gloves

#### **Color-Coded Labels**

Color-coded labels allow users to quickly identify the devices designed for general or electrical applications

#### **Control Lever**

When closed, tension on the cable can only be increased. Internal ratcheting mechanism allows users to add tension, even after safety padlocks have been applied. Opening the control lever releases the lockout

**S866** 

**Contoured Design** Allows stacking of multiple devices for easy storage and transportation

#### **Cable Release Button**

With the control lever open, pressing this button releases the cable after the lockout is complete

#### **Cable Clip-In Pocket**

Cable snaps into pocket and remains in place until control lever is opened and cable release button is pushed, preventing premature removal

#### Cable

2.7m color-coded cable for easy identification and improved visibility in the work environment. Red steel core cable for general applications. Yellow nylon core cable for dielectric applications

#### **Lock Holes**

Four 10mm lock holes allow for safety padlocks and hasps to secure the device during lockout
