SELECT ACCESS® SMART

Smart,
secure
key storage

Share the access to your house keys via your Smartphone

Stop hiding your keys under the doormat or under a flower pot!

With Select Access® SMART, sharing your house keys has never been easier: everything is managed via your Smartphone.

Share the access
to your house keys
remotely and in
real time

Get the
complete
access
history

Be notified
about any
unauthorised
attempts to open it

SMART SECURE STORAGE

WELL-DESIGNED SECURITY

SECURITY PEACE OF MIND

With Select Access® SMART, sharing access to your house keys has never been easier.

- No more getting keys copied for your parents or hiding keys under the doormat.
- No need to change your access-codes after contractors have been in.

Keep your keys safe in your Select Access SMART and easily share access with people you choose via your Smartphone!

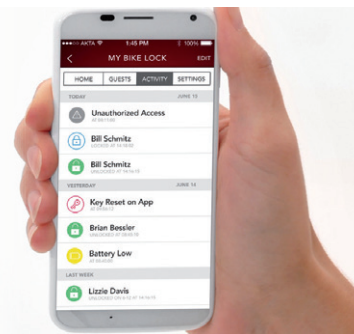

YOUR SMARTPHONE BATTERY DIED ?

If the battery of your Smartphone is flat, Select Access SMART can also be unlocked with a personal combination.

If you forget this combination, a help code stored on your Master Lock Vault® eLocks app (also accessible from a computer) will enable you to unlock it again!

ACCESS SHARING MADE EASY

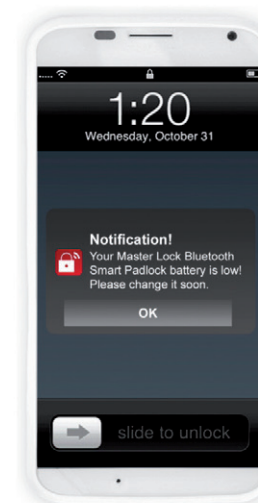

Share access to your keys via the free Master Lock Vault™ eLocks app and choose the people (parents, babysitter, plumber, etc.) you wish to allow access, all from your Smartphone.

The choice of contacts is unlimited and the sharing is immediate. At any time, you can cancel or add accesses - and even choose to give access to your keys for a limited time period.

Via the app, you can fully monitor access to the Select Access® SMART. A log lets you know the complete access history:

- Who used your house keys?
- At what times during the day?
- How many times?

You will even be alerted to unauthorised access attempts.

YOU WILL BE ALERTED WHEN IT'S TIME TO CHANGE THE BATTERY

If the battery of your Select Access® SMART is getting low, you will be alerted by a yellow signal light and you will receive messages via the Master Lock Vault® eLocks application.

So you will always know when it is time to change the battery!

If the battery wasn't changed in time, it's no problem: simply plug a 9V battery into the backup compartment located under the box and you will be able to unlock it and change the CR123 cylinder battery.

SECURITY COMBINED WITH TECHNOLOGY

Next generation technology, the Select Access® SMART is designed to guarantee you an excellent level of security and still be ideal for outdoor use.

Its zinc construction and dual locking mechanism guarantees better resistance against attacks providing perfect protection for your keys.

The Master Lock Vault™ eLocks mobile application, which can be downloaded free of charge, uses state-of-the-art security and decoding norms to warn you of any attempt to steal information.

Data transmitted in Bluetooth® Smart between your Smartphone and your Select Access SMART have a very high level of encryption to ensure maximum security against pirating: only authorised individuals are able to have access to your keys.
