For Immediate Release

Master Lock Multi-User Lock provides convenience for customers and staff

Simple, streamlined locker security for anyone, anytime

(MILWAUKEE, WIS.) – November 20, 2013 – Master Lock® Company LLC is entering a new market with the introduction of the Multi-User lock. Designed for use in facilities with multiple customers using the same locker throughout the day, this exclusive Locker/Cabinet category product simplifies the process for facility managers as well as the user at properties such as health clubs, gyms and spas, country clubs and others.

The Multi-User lock reduces specific, time-consuming procedures previously handled by staff and management by allowing the client to set their own personalized 3-digit combination and clear it for the next user. A supervisory override key allows access to any locker at any time for instances like a forgotten combination. There is no longer a need to cut off padlocks brought from home due to a forgotten combination or a lock left behind at the end of the day. See a video demonstration of how the lock works at <http://bcove.me/ixqon72q>.

“The new Multi-User lock offers greater convenience for organizations and their clientele at any facility where lockers are needed for temporary use. Customers no longer need to bring their own locks or register for a key at the front desk,” explained Kevin McCarthy, Master Lock’s Product Manager for Locker Locks. “They simply find a locker, set their combination, lock the locker and leave. When they are done with the locker, they simply scramble the dials to reset the lock for the next user.”

This durable, reliable and easy-to-operate lock employs the latest in locking technology from the most recognized name in the security products industry. With three different models available and an optional extension kit, this lock fits virtually any metal or wood locker design. Models

3630 and 3631 are used on lockers with a lift latch, and model 3670 has a retractable deadbolt more fitting for wooden locker doors.

The Multi-User lock will be available in January 2014. Stickers or magnets with user instructions for placement on lockers will be available for purchase. For more information about the Multi-User lock and other locker products, visit www.masterlock.com.
