For Immediate Release

Master Lock® expands product line with new tool-free Universal Miniature Circuit Breaker Lockout

(MILWAUKEE, WIS.) – March 4, 2014 – Master Lock® Safety Solutions™ has launched a new product line extension with the new S2394 Universal Miniature Circuit Breaker Lockout. Designed to work with all Master Lock and American Lock® safety padlocks and lockout hasps, the tool-free design makes it simple to apply and lockout nearly any type of miniature-circuit breaker.

Built from a durable, chemical resistant Zenex™ thermoplastic material, the S2394 can withstand extreme environments where Lockout/Tagout is performed. The cover easily pivots open and closed so the dial is inaccessible in the locked position to prevent removal. The device can be mounted side-by-side on adjacent miniature circuit breakers and padlocks can be applied horizontally or vertically to lock out more than one breaker simultaneously.

“The new S2394 has many advantages, starting with the intuitive design,” said Matt Dudgeon, Master Lock Global Safety Product Manager. “The device is universal, so it will fit virtually all miniature circuit breakers in the market. It features an exterior cap that covers the thumb dial screw once installed, preventing unwanted removal. We believe the S2394 will make a great addition to our mini-circuit breaker lockout family of products.”

Other Master Lock Miniature Circuit Breaker Lockout Devices include the S2390 that fits pin-out breakers 11mm or less; the S2391 for pin-out breakers from 11mm – 13mm; the S2392 that fits breakers with pin-in toggles; and the S2393, which fits universal breaker toggles.
