Defend your bike with the Master Lock® advanced urban security range

Bicycles are the most stolen item in the UK with almost 400,000 pinched every year – that's one every 90 seconds (Source: Direct Line, 2015). Master Lock®'s new advanced urban security range aims to combat this rise in crime with the ultimate mix of technology, protection, flexibility and functionality to thwart thieves.

Bluetooth locks operated by your smartphone with military grade encryption, Sold Secure gold award models designed to resist aggressive theft attempts, and miniature U-lock marvels that fit neatly into back pockets and purses are all part of the impressive line-up.

Synonymous with security for over 100 years and the byword for 'padlock' in the United States, Master Lock® could be the biggest brand you've never heard of. A global leader and innovator in security solutions, the company also invented the original laminated padlock and the first dial combination padlock.

This legendary heritage and continued pursuit of excellence from a name you can trust is encapsulated in the new range, developed by Master Lock®'s experts to combat even the most aggressive theft attempts, whilst also protecting the lock against all the elements the British weather can throw at it.

Master Lock Smart™ Bluetooth® padlocks are the latest innovation in bike security with no need for keys or combinations, and the ability to allow shared access with friends and family.

The award-winning water resistant padlock is easily operated from your smartphone, thanks to the feature-rich, free accompanying Master Lock Vault eLocks app, complete with military grade authentication and encryption.

The app not only does away with the need for keys and combinations, it can also grant time-limited remote access to your bike. Meanwhile, a tamper alert informs you of any unauthorised openings.

Battery life lasts up to five years, but just in case you'll receive an app notification if it's running low on power. For complete peace of mind, a manual override is there in case you don't have your phone or you need kick-start the battery.

The padlock offers the highest levels of strength, reliability and functionality of any Bluetooth model on the market, and is easily combined with a top quality pre-cut chain.

Criterion™ Locks – Maximum Security

Designed to resist every kind of aggression, such as drilling, picking or cutting, and provide ultimate flexibility for cyclists, the brand new Criterion™ range carries a coveted Sold Secure gold rating from the Master Locksmiths Association.

Choose between the highly adaptable Criterion™ U-lock or case hardened Criterion™ chain lock, developed by Master Lock®'s expert engineering team to address every potential security issue, and including anti-dust keyway protection, an intensive anti-corrosion treatment and a premium silicone coating for comfort when handling.

The **Criterion™ U-lock** has an elongated U-section making it highly adaptable for any bicycle frame and for attaching it to fixed points. Its 16mm diameter octagonal case hardened steel U-bar offers maximum resistance to bolt cutters, while a 7-pin disc cylinder lock provides ultimate protection against picking, twisting and other impacts.

The **Criterion™ chain lock** provides a continuous barrier of 1m x 10mm case hardened steel square links for thwarting bolt cutters and sawing. The chain also offers optimum protection against leverage and impacts. A 16mm octagonal mini U-bar combined with the chain means bikes can be easily secured to a fixed point.

Premium Security Locks

The Master Lock® premium security range secures bikes against theft in urban areas thanks to a Sold Secure gold rating, and includes an easy-to-carry compact version.

Both locks in the range have a 14mm diameter case hardened steel shackle with a high resistance to bolt cutters and a 7-disc cylinder for protection against picking. Coated to protect against dust and scratching the bike frame, the locks also come with four keys for sharing or in case of loss.

The premium security **Mini D-Lock** is Master Lock®'s lightweight and compact marvel aimed as busy commuters and couriers. The lock slips easily into back pockets, belts or purses.

A standard size premium security **D-lock** is adaptable to all types of bicycle frames and designed with high durability for everyday use. The lock comes with a mounting bracket for fixing it to the bike frame.

Master Lock.

Warranty and online protection

All mechanically locking products benefit from a limited lifetime warranty against mechanical failures. Master Lock® will replace any defective mechanical products free of charge. Bluetooth padlocks have a two year limited warranty.

After purchase, customers are advised to register their key number in the digital Master Lock Vault®. If your keys become lost, the number can be used to produce a new set. The digital Master Lock Vault® is a free service and can be used to store other sensitive data, such as passwords, pin numbers and combination codes from a computer, smartphone or tablet. Simply open an account at www.masterlockvault.com
