Bloqueo de válvula

GENERALIDADES Y CARACTERÍSTICAS

Características del producto

- Durable, lightweight thermoplastic material is chemical resistant
- Performs effectively in extreme environments
- Locking holes are compatible with all Master Lock safety padlocks
- Adjustable design fits 2in (51mm) to 200mm (7.8in) valves

Detalles del producto

The Master Lock S3079 is designed to ensure OSHA compliance and peace of mind during lockout involving ball valves. By encompassing the ball valve lever, these easy-to-use, adjustable lockout devices secure against inadvertent valve activation and will enable lockout by multiple workers at each lockout point.
